WORK EXPERIENCE

SOFTWARE ENGINEER - EQUITY SOLAR

Perth, WA

Full-Stack development for Energy Systems | *ReactJS, NextJS, Go, Typescript, HTML, CSS*

Aug 2025 - present

- Sole developer responsible for the full-stack delivery of a client-facing virtual power plant platform, including **UI design, backend development, infrastructure, deployment, and DevOps**.
- Developed an integration platform to aggregate data from solar providers supporting a large amount of battery brands.
- Created a platform which organises and displays large amounts of battery data.
- Independently managed architecture, deployments, production troubleshooting, and continuous product improvement.

SOFTWARE ENGINEERING INTERN - ABLE

Perth, WA

Software Engineering Intern for a Learning Management Platform | *Dotnet Framework, C#, HTML, CSS*

Sep 2025 - Feb 2026

- Collaborated with senior developers to design and implement responsive user interfaces using **HTML** and **CSS**.
- Developed backend systems to integrate scheduling software, improving data flow and system coordination.
- Assisted in debugging, testing, and deploying front-end features while following modern development workflows (e.g., **Git, Agile, REST APIs**).

OTHER PROJECTS

HTTP SERVER | *C Programming Language*

Multithreaded HTTP Server implementation using the C programming language with the only library used being glibc.

- Implements non-blocking TCP networking with epoll with request parsing, routing, serialization and async socket writes.
- Created a fixed sized worker thread pool with bounded produced consumer queue using POSIX threads and pipe signalling to integrate background work with the main event loop
- <https://github.com/Fozzyack/http-server>

CACHE LATENCY BENCHMARK | *C Programming Language*

A low level CPU memory latency benchmark to compare the latency between L1 cpu cache reads with flushed cold access reads.

- Uses timestamp counter measurements, memory fences and cache flushing to isolate memory access costs.
- <https://github.com/Fozzyack/cpu-cache-latency>

PASSWORD CHARM | *Go*

A secure terminal based password manager in Go using the Bubble Tea and Lip Gloss libraries.

- Built a secure password manager to create a keyboard driven TUI for viewing and storing credentials with GPG encryption.
- <https://github.com/Fozzyack/password-charm>

VOLUNTEERING

CODERS FOR CAUSES - BOOKING SYSTEM

Perth, WA

Full-Stack development of a Booking System | *ReactJS, NextJS, Django, Typescript, Python, HTML, CSS*

- Serving as volunteer helper / tech lead for a youth-nonprofit booking platform focusing on defining **Django-Next.js system architecture**.
- Tutoring 2 university colleagues through weekly 1:1s and pair-programming, raising their PR acceptance rate.
- <https://github.com/codersforcauses/>

TECHNICAL SKILLS

Languages: Typescript, Golang, C#, C++, C, Python, HTML/CSS. SQL

Frameworks & Tools: NextJS, React, Nextjs, Django, Vim, PostgreSQL, Docker, Git, Drizzle

EDUCATION

UNIVERSITY OF WESTERN AUSTRALIA

Bachelor of Commerce and Engineering Science

Perth, WA

June 2024
